Title: Mass Scale Production of Copepods for Marine Aquaculture

- Cortney L. Ohs, Assistant Professor University of Florida Department of Fisheries and Aquatic Sciences and Indian River Research and Education Center
- Andrew L. Rhyne, Post-Doctoral Associate University of Florida Indian River Research and Education Center

Summary of Accomplishments July 17, 2008 to September 30, 2008.

We have purchased algae production equipment, installed it, and have grown algae to feed to copepods. We have demonstrated mass production on a research scale of 200L plastic drums. We have purchased supplies to demonstrate mass production on a commercial scale. We have begun the planning experiments on the cold storage of copepod eggs.

To date we have completed 25% of the proposed objectives.
